Permit for Open Trenching and Road Borings Within Town Rights-of-Way

Applicant _____ **Telephone** _____

Address _____

Description of Work to be Performed:

Applicant is required to contact *Dig Safe* prior to commencing of work to be performed.

Applicant will contact Rochester Highway Department at least 3 days prior to commencing work.

Piping used to enclose wiring and other materials within town rights-of-way will be Schedule #40 (or equivalent).

Only suitable backfill will be permitted within the roadway portion of highway, with at least 12" of crushed gravel in the final lift of backfill.

All backfill material will be compacted in lifts not to exceed 12" in depth with jumping jack compactor (or equivalent).

Warning tapes will be placed in open trenches within a reasonable distance above said utilities. Applicant will furnish the Rochester Highway Department with drawings that show depths and locations of all buried utilities within town rights-of-way.

It is the sole responsibility of the applicant for the maintenance and repairs of all utilities placed within the town right-of-way.

It is the responsibility of applicant to furnish all traffic control necessary to complete this construction project in a safe and responsible manner.
